specific performance of this Contract. Waiver of any default under this Contract shall not be deemed a waiver of any subsequent default.

IV.
Revisions of the Scope of Services

PROJECT DESCRIPTION

This project consists of the replacement of the existing erosion control system along nearly 500 feet of Hutton Branch, downstream of Josey Lane. The existing system consists of gabion, concrete, and masonry elements that generally consists of a channel lining, short retaining walls

on both sides, and armored side slopes above the walls. The system is currently experiencing multiple failures which include concrete lining buckling, gabion basket corrosion, gabion basket bulging, and side slope instability. It is our understanding that the intent is to replace the system to

the same general geometry. Walter P Moore may recommend modifications to the materials for the purpose of a more durable long-term solution.
